

LG V20 Battery Replacement

This guide will show the steps required to remove the battery in the LG V20.

Written By: Garrett Janney

INTRODUCTION

Is your LG V20 losing charge quickly or not reaching full charge? The battery is most likely damaged and needs to be replaced. Luckily, the LG V20 has an easily removable battery which can be accessed in a few steps. This repair guide will lead you through the process of replacing the battery to get your phone back to running at full capacity.

Step 1 — Battery

- Flip over the phone and lift the back cover off while pressing the small button on the bottom left side.

Step 2

- Place your thumb along the bottom of the battery and pull up to remove the battery.

To reassemble your device, follow these instructions in reverse order.
